

ABSTRACT

A system and method for hosting entity-specific photo-sharing websites for entity-specific image capture devices is disclosed. The system and method provide software for the entity-specific image capture devices that causes the image capture devices to transmit entity ID information when the image capture devices transmit images over the Internet. The system and method further provide an online photo-sharing service capable of hosting the entity-specific photo-sharing websites for each of the entities, such that when the image capture devices connect to photo-sharing service, the photo-sharing service uses the entity ID received from the image capture devices to automatically associate the image with the photo-sharing website of the identified entity.
